

# Acumen® Recharge

## A Smart Choice

Acumen with ceiling brackets

■ The battery-operated **Acumen® Recharge** surface mounted rechargeable projection screen is a smart choice — installs as easily as a pull-down screen with **no electrician needed**.

*An elegant, extruded aluminum housing with an attractive finish adds polish to this below-ceiling screen so Acumen looks great even when not in use.*

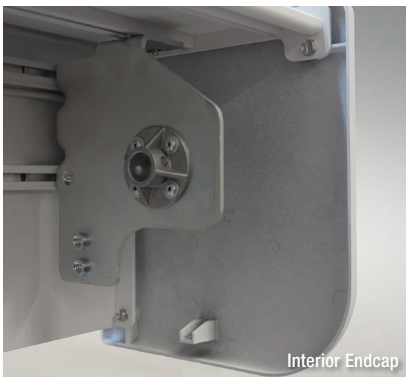

*Floating mounting brackets and removable fascia allow for **easy installation and maintenance**. Address varying surrounding environment conditions and complement any room design with the Acumen Recharge.*

**Acumen Recharge V:** Brings maximum flexibility to electric projection screens.

- **Rechargeable, with no wiring** required for power or control.
- All controls are wireless: add an optional hub to control with a mobile app, Google Home, or Alexa.
- Each charge lasts approximately **500 cycles**.
- Sizes through **10' wide**, with choice of tab-tensioned viewing surfaces including TecVision®.
- Extruded aluminum housing with white powder coated or optional black finish.
- **Extended 7-year warranty.\***
- Patent pending.

**Acumen Recharge E:** All of the features of the Acumen Recharge V, but with free-hanging viewing surfaces.

\*In the USA and Canada.
