

GYM DIVIDER CURTAINS FOLD-UP

ACCORDION FOLD-UP ACTION

- Engineered with all welded or heavy-gauge stamped hardware, the Fold-Up Gym Divider Curtains electrically divide one space into two with the turn of a key switch. The accordion fold-up action is smooth and designed for years of reliable service. Passing cables through grommets in the fabric creates an accordion fold-up action as the bottom tube is raised. Divider is available in either all solid vinyl, vinyl coated polyester mesh, or a combination of mesh on the top and solid on the bottom.

FEATURES:

- Available in a wide variety of vinyl and mesh colors.
- Divider can be made in virtually any size, but cannot be cut out for bleachers or doors.
- All seams are vertical and electronically welded with a 1" (25 mm) full contact weld.
- Outer edge hems are turned with double welds.
- Stores overhead from supporting steel structures.
- Includes electric winch.

WEIGHTS/MEASUREMENTS:

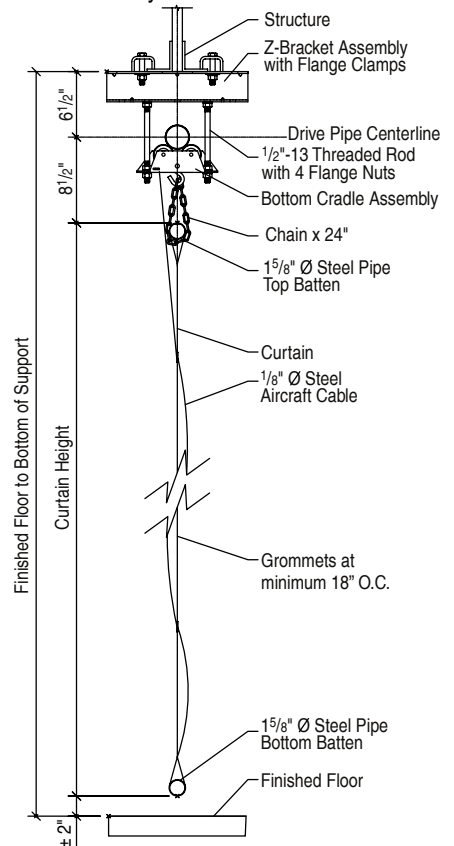

- Minimum 6" (152 mm) clearance is required between vertical edges of adjoining curtains and fixed objects. A 3' (9.14 cm) clearance recommended at ends of curtain for egress.
- Total hanging weight is approximately ½ lb per sq ft (2.44 kg/m²).
- Stacking dimension is approximately 2-½' (76.2 cm).
