

**High Contrast/Extra Wide Viewing Cone/On-Axis Gain of 0.8**

- 0.8 on-axis gain, Ambient Light Rejecting (ALR).
- Moderate/full ambient light.
- Short/standard throw projection.
- Wide viewing angles.
- Lens/Throw distance ratio for best uniformity: 0.7:1 or longer.

**Surface Characteristics**

- Maximum image height: 22' optically seamless.
- Weight (g/sm): 388
- Thickness (mm): .35
- Cleaning: Mild soap and soft cloth.
- Flame and mildew resistant.
- Composition: Flexible PVC.
- Also available in a nano perforated option up to 96" in height.

**Reflective Performance\***

- Gain Chart: See below.
- 0° Gain: 0.80
- Half Gain Angle: 50°
- ALR: 57%

*\*Individual test results may vary slightly.*

*TecVision® is an exclusive line of premium projection surfaces designed, formulated, and manufactured by Draper® to exacting standards for unparalleled uniformity, performance, and quality.*

*TecVision surfaces are available in 3 categories to fit any application:*

- **Performance/Reference Whites for dark spaces/controlled lighting.**
- **Premium Contrast Greys for increased contrast in controlled light applications.**
- **Ambient Light Rejecting (ALR) for uncontrolled light applications.**

*All TecVision surfaces are 8K-ready and certified color-accurate by the Imaging Science Foundation (ISF).*
